

EDUDRONE.EU

Co-funded by the
Erasmus+ Programme
of the European Union

Drone European Platform (DEP) project and the use of Drones offer a variety of interesting opportunities in the field of agriculture

DEP is willing to develop and present a holistic approach to the increase of effectiveness of educational offers in what is related to delivering to the world of work better qualified trainees

OBJECTIVES:

- To include innovative technology in VET specifically in agriculture curriculum
- To develop a Drone Course at the European level
- To increase the skills and knowledge of teachers in the area of drones and their ability transmit and implement it on the learning process of their students
- To prepare students with the skills to find a job more easily
- To train other trainers to acquire current knowledge and to prepare them to transmit that information to their students
- To unify agricultural sector between countries
- To convert countryside and agricultural job in an attractive career for youngsters
- To learn from the different countries participating in the project and their national legislation, the uses of the drones in their countries and the trends drones are initiating
- To establish a network of knowledge and exchange of ideas at European level that helps to learn and acquire the necessary skills to use drones

AIMS:

- To exchange legislation, knowledges, courses and materials on the use of drone in VET
- To make video lessons generated in the training course
- To promote mainstreaming
- To train teachers, leaders and other school staff in promoting innovation.
- To spread around Europe, the knowledge on how to use drone in education.
