

Halfway through a project: DRONE EUROPEAN PLATFORM ERASMUS+ KA2: 2017-2019

The main outcomes of the project are as follow:

- Legislation in partner countries
- Good practices for drone use
- Free Course on “HOW TO BUILT A DRONE” + video tutorials
- Theoretical lessons and videos available on our Drone platform
- Drone application in precision agriculture
- 12 people attend the training course on “HOW TO BUILT A DRONE”
- About 100 teachers and students trained through DEP COURSE “HOW TO BUILT A DRONE”

Challenges:

- Legislation of using drone (too many roles)
- Meeting deadlines
- Intercultural relations and collaborative learning among participants
- Improve teacher’s skills and thus will benefit their students as well
- New innovative curricula/educational methods/development of training courses

What next?

- Training session (building a drone) in Valencia, Spain
- Video tutorial
- Implementation of tools and good practice,
- Testing the platform
- Cascade training
- Dissemination
- Making project results used
